| Job title: | Geotechnician, Senior Geotechnician, Principal Geotechnician |
| Work Location: | Southampton |

About Ocean Infinity

Geowynd is part of the Ocean Infinity group offering market leading advanced geotechnical services to the offshore energy market globally.

Our mission is to deliver data-driven advanced geotechnical analysis to our clients to the highest standards to ensure that ground risks are mitigated, and design opportunities are realised. Geowynd are committed to supporting the global transition towards fossil-fuel free living, enabling people and the planet to thrive.

Due to continued success and growth, Geowynd are seeking a Geotechnician to perform advanced laboratory testing in a planned geotechnical laboratory in Southampton.

Description and Main Purpose of the Job

The successful candidate will be a core team member at Geowynd and will provide the highest quality, high value data for interpretation by the geotechnical engineering team. The Geotechnician role will be focused on the execution of laboratory testing, and data processing of same, but other duties will include calibration of equipment, and an active role in the accreditation process, including being audited by external assessors. Applications at all grades (Geotechnician, Senior Geotechnician and Principal Geotechnician) are welcome at this time.

What will you do:

- Supervising and performing advanced geotechnical laboratory testing, including monotonic and cyclic triaxial and direct simple shear, and resonant column testing.
- Preparation of samples for testing, ensuring samples are available to promote efficient progression of test programs.
- Processing test data with the utmost diligence, taking care to ensure the data is as accurate as possible.
- Ensuring test programming and tracking software is updated to allow accurate testing progress updates to be provided to clients.
- Performing daily equipment & environmental quality checks throughout the laboratory, informing the Laboratory Technical Manager where anything out of the ordinary or out of specification is found.
- Taking an active role during accreditation assessments and performing verification tests when required to do so.
- Performing routine equipment calibrations and checks, whether planned or as requested.
- Assisting in the training of colleagues as required by the laboratory management.
- Ensuring a high level of cleanliness throughout the laboratory facility, and ensuring the equipment is maintained to the highest standard.
- Complying with Geowynd management system policies, practices, programs, and procedures.
- Supporting Geowynd's environmental and social goals.

JOB DESCRIPTION

Who you are:

- The ability to operate within a team, and at times be comfortable working under your own initiative.
- An aptitude for mechanical testing.
- An eye for detail, and the ability to follow written procedures.
- Competency with the Microsoft Office suite of software.
- Experience in the execution of geotechnical laboratory testing across a range of soil types, including triaxial and direct simple shear testing.
- Experience in the execution of laboratory equipment calibrations and checks.

- Thoughtful, thorough and conscientious;
- Interested in the others and strives for the best for the team;
- Ability to take ownership and engagement in the work;
- Excellent time management skills and ability to prioritize work in a fast-paced environment;
- Strong leadership skills;
- Strong interpersonal and people management skills;
- Strong communication skills;
- Driven, proactive and able to work autonomously with little supervision towards the company's purpose;
- Critical thinking and ability to show initiative;
- Open and receptive to new and different ideas;
- Ability to work well in a team and independently;
- Enthusiastic about protecting people and the planet.

What you can expect:

Since the beginning we are committed to provide all our people with the best possible work conditions and benefits. Therefore, as we grow globally, we are constantly striving to go beyond what's usually considered to be the 'market average.

At Geowynd, we believe in creating equal opportunities for all, celebrating each and everyone's differences. We are driven by transforming the industry, through our technology, thoughts, behaviours and actions. Being inclusive and respectful to all is fundamental to who we are. It is the right thing to do and enables innovation and creativity to thrive.

We are an Equal Opportunity Employer and believe that our environment can be anyone's environment, and one that is sensitive to local needs.
